

6.6

3-way Proportional pressure reducing valve

Type 3DREP and 3DREPE

NG 6

Max pressure 100 bar

Max flow 15 L/min

Contents

Function and configuration	02

Characteristic curves	06
Unit dimensions	07-08

Features

- Directly controlled proportional valves for the control of the pressure and direction of a flow
- 3-Way design and standard ISO 4401-03 mounting
- Operated via proportional solenoids with central thread and removable coil
- Spring centred control spool
- Hand override, optional
- 3DREP: available module amplifier
- 3DREPE: integrated electronics (OBE) with voltage input or current input (A1 resp. F1)

Function and configuration

General:

The 3-way pressure reducing valve type 3DREP 6... is directly actuated by proportional solenoids. They convert an electrical input signal into a proportional pressure output signal.

Design:

The valve mainly comprises of: Housing (1) with mounting surface, Control spool (2) with pressure measuring spools (3), Solenoids (4) with control thread and Optional integrated valve electronics (5).

Function:

With the solenoids (4) de-energized the control spool (2) is held in its center position by compression springs. The control spool (2) is directly actuated when one of the solenoids is energized E.g. by energizing solenoid "a". The pressure measuring spool (3) and control spool (2) move to the right in proportion to the electrical input signal. The connection from P to B and A to T is via orifice form cross-sections with progressive flow Characteristics – De-energization of the solenoid (4). The control spool (2) is returned to its centre position by the compression springs.

In the middle position the connections A and B to T are open, therefore, the pressure fluid can freely flow to tank.

Electrical connections, plug-in connectors

• For type 3DREP6...L2X (without integrated electronics)

Connections on the component plug

Plug-in connector to DIN EN 175301-803 or ISO 4400

Connections on the plug-in connector

• For type 3DREPE6...L2X (with integrated electronics (OBE))

For pin allocation also see block circuit diagram.

Plug-in connector to DIN EN 175201-804

• Integrated control electronics for type 3DREPE6

Component plug allocation

	Contact	Interface A1 signal	Interface F1 signal
Supply voltage	A	24 VDC (U(t)=19V to 35V)	
	B	GND	
	C	n.c. ¹⁾	
Differential amplifier input	D	$\pm 10V$, $R_e > 50K\Omega$	4 to 20mA, $R_e > 100\Omega$
	E	reference potential command value	
	F	n.c. ¹⁾	

¹⁾ Contacts C and F must not be connected!

Connection cable:

Recommended:

- up to 25m cable length type LiYCY 7 × 0.75 mm²;
- up to 50 m cable length type LiYCY 7 × 1.0 mm².

For outside diameter see plug-in connector sketch. Only connect screen to PE on the supply line.

Command value:

Reference potential at E and positive command value (0 to +10V or 12 to 20mA) at D result in pressure in A.

Reference potential at E and positive command value (0 to -10V or 12 to 4mA) at D result in pressure in B.

With valves with 1 solenoid on side b (design A): Reference potential at E and positive command value at D result in pressure in A.

With valves with 1 solenoid on side b (design B): Reference potential at E and positive command value at D result in pressure in B.

• Integrated electronics (OBE) for type 3DREPE6

²⁾ PE is connected to the cooling body and the valve housing!

³⁾ Protective conductor screwed to the valve housing and cover.

⁴⁾ Ramp can be externally adjusted from 0 to 5s, the same applies for T_{up} and T_{down} .

⁵⁾ Output stages current regulated.

Characteristic curves (measured with HLP46, $\vartheta_{oil}=40^{\circ}\text{C} \pm 5^{\circ}\text{C}$)

Pressure stages 16, 25 and 45 bar

Pressure stages 16, 25 and 45 bar

Pressure-flow relationship
